Mr. Monty Karns, City Engineer
PO Box 1449
723 S Lewis St.
Stillwater, OK 74076

Gentlemen.

Thank you for our meeting(s) the past month regarding the desire of the City of Stillwater's development of a Low Impact Bicycle Route through the City. We are excited to see this type of initiative to help bicyclist have a safer environment to ride within the city.

We also are supportive of the option for the bike route to come through Duncan Street by our church property and in concert with our short- and long-range plans for this area. Please know that we look forward to working with the City of Stillwater and your consultant to find an amicable solution as the plan moves forward into the development stages. Additionally know we are working to remove the abandoned house adjacent to the proposed route.

Again, we look forward to the development of this Low Impact Bike Route for Stillwater and will work toward solutions to utilize Duncan Street and a portion of our property as details can be worked out.

Sincerely,

Gary Johnson, Chairman of the elders
Stillwater Church of Christ

CC: Elders and Building Committee
