

QUESTIONS/ANSWERS FOR BID # SUA 04-19/20

1) Where is the material currently being processed?

A local operation Cedar Creek Farms.

2) Bid # SUA 04-19/20 requires a bid bond. What is the bid bond amount?

Attached is addendum #1. The addendum will answer your below question.

3) I cannot identify where I can add our processing charge. Are we able to write in our processing fee on Exhibit A – Bid Form, even though there is no place? If we write in a processing charge, will our bid be accepted or thrown out because we added an item not on the Bid Form?

Attach a document with the processing fee or any other fees that were not included to Exhibit A when turning in for BID opening.

4) Does this RFP just include the purchase of your commodities or are you needing a processing facility in Stillwater for the City recycling trucks to empty? We have a single stream MRF located in OKC that we could transport the material for processing. How is it being processed currently?

We are looking for bids regarding processing of our recyclables and any potential revenue sharing. We would transport the recyclables to the facility selected.

5) Is there more information other than the packet on the City website? Who can provide additional information on this RFP?

All questions and any requests for additional information can be directed to Chris Knight (cknight@stillwatr.org).
